No. 7

COMPULSORY CLUB FEES

The recommendation of this brief has been made after careful consideration of all pertinent facts and conditions by the club chairmen as represented on the Engineering Society Executive Committee.

Proposal . . .

1. That a club fee of \$1.00 be levied upon payment of fees to the University Bursar.

2. That the equivalent sum be put at the disposal of the Engineering Society to be redistributed to the respective clubs to the extent of \$1.00 for every student registered in that particular department.

3. If the membership of any club should be less than 40 members (excluding the Debates Club), a sum to make up the club treasury to \$40.00 shall be voted by the Engineering Society Executive Committee.

4. The Debates Club shall get a grant of \$25.00 from the Engineering Society.

Reasons for . . .

1. The Society feels that a compulsory club fee entailing the compulsory club membership would be able to do away with the very disagreeable task of soliciting club membership at the very inopportune time shortly after registration when most students are not in the best of financial straits and the pressure of a new semester weighs heavily upon their minds.

2. It is further felt that by 100 per cent membership, a greater interest in club affairs would result. Having paid their membership fee they would be out to see that they received their due remuneration.

3. Better interest in the club would be stimulated as a result. This would be a direct outcome of the club executive having a reasonable sum upon which to plan their activities for the year.

4. By compulsory club fees it is felt that an improvement in the executive ability would result. To date the chief duty of club representatives has been to solicit membership and collect fees. This is a distasteful task at its best. By eliminating this disagreeable task it is felt that there would be keener interest in club elections which in all would result in better co-operation of club executives.

5. It is felt that the main object of clubs in promoting interest in their respective lines would become the paramount

objective in the fall term rather than soliciting a questionable membership.

6. It is felt that by taking part in club activities a student will obtain a fuller understanding of his responsibilities to his club and thereby lay the foundation for interest in public life after graduation.

Reasons Against . . .

1. No student should be compelled to join a club or any such organization against his own free will. A student in Engineering is old enough to make this decision for himself, and should be free to exercise his own judgment.

2. When the membership of a club depends substantially upon the quality of program provided, the executive certainly will make a greater effort to provide a superior series of club activities. If a club is worth while, the students will join voluntarily.

3. A club should stand on its own merits. One doing so claims a higher prestige than a club depending on the faculty to extract its membership fee from the students.

4. Club representatives should not feel that soliciting club membership cards is an unpleasant task. A properly functioning executive gives the member value for his money. The representative has the opportunity to develop salesmanship through selling a legitimate idea. At the same time, he makes a personal contact with every student in his class.

5. Compulsion is not likely to promote club or school spirit, but rather would tend to sour the members towards the club. A man will support more willingly an organization he joins voluntarily than one he joins through compulsion.

FOR ELECTION RESULTS FRIDAY EVENING

Phone MI. 6611

Between 6.00 and 7.30 p.m.

J. CAWLEY Acclamated President

Without exception, this is the most important job I have ever tackled. But come what may, I shall endeavour to carry on the high standards and traditions of the Engineering Society, and I shall execute my duties with the utmost vigour.

To those who may have opposed me in this election and to those who did not, I say "Thank You". To the many loyal friends who would have helped me campaign, I am still humbly indebted, and in the coming year I shall try to do justice to their confidence in performing my obligations in a manner which I trust they will approve.

In the elections which take place on Friday, be sure to cast your vote. In these times of strife and dictators, it is to our own advantage to exercise our freedom of franchise whenever we have the opportunity. Be certain to capitalize on this symbol of freedom.

To harangue at further length would be to take advantage of a situation, and to bore you. Therefore, without further "ado" I say "Thanks, men".

JIM CAWLEY.

HOW TO VOTE!

Each Schoolman shall go to the polling station for his year, where he shall receive the proper ballots from the returning officer and have his name checked off the list there. After marking his ballots carefully, he shall return them, UNFOLDED to the returning officer, who will deposit them in the ballot box.

The Hare-Spence system of voting is used. In this system, the voter marks opposite the name of the candidate for whom he wishes to vote, the figure 1, while opposite his second choice he marks the figure 2, and opposite his third choice the figure 3, and so on. It is essential that the voter mark a figure beside every candidate's name, or the ballot will not be accepted.

When the candidates' first choices are added, the candidate with the lowest number goes out, and his "second choices" are distributed among other candidates, counting as first for whom they were cast.

This method of elimination is followed until only two candidates are left, and the one with the largest number of votes is declared elected.

JERRY HEFFERNAN

First Vice-President Engineering Society

Election time is here men and Jerry Heffernan is up to bat again—this time for one of the most important jobs in School—First Vice President of the Engineering Society.

Last year the class of 4T3 put me in as Secretary-Treasurer to handle their finances and keep things running smoothly. Besides this job I managed the B.W. and F. Team for School. A look at the results of the Senior Assault will give you an indication of our effort that went into that—19 out of 30 finalists were Schoolmen.

This is just to let you know that I have the drive, energy, and experience to put this First Vice-President's job over. When you choose a man to look after affairs such as School Dinner, School At-Home and School Nite, you want a fellow with plenty of ideas and the initiative to make them work. I have both the ideas and initiative and in addition have gathered experience in handling the year parties for 4T3. With a summer before me to get the plans I have thought up into working order, I can promise you a bigger and better School Dinner, with room for everybody and new ideas to make School At-Home and School Nite the best ever.

So remember when you vote—

"HEFFERNAN HAS THE PUSH TO PUT IT OVER"

FIFTH VERSUS FIFTH

This year there are two members enrolled in Fifth Year Architecture. This puts them in a class by themselves. Naturally, at election time, each was determined that the best man was to be elected for councillor of department four. They nominated each other respectively for this office. Curiously enough, only the graduating year of each department can vote for their councillor so it means that the two candidates

PROGRAMME

12.00 noon—Assemble outside north door of School Building. Parade with Pipers to Hart House. Proceed to the Great Hall for special luncheon.

1.00 p.m.—Return to School Building to exercise lungs and franchise.

2.30 p.m.—Polls close.

2.58 p.m.—Curtains rise.

POLLING STATIONS ALL IN ENGINEERING BUILDING

1st year—Top Floor.

2nd year—Second Floor.

3rd year—Main Floor, Machine Design Lab.

4th year—Main Floor, Main Hall.

Polls open from 1.00 to 2.30 p.m.

PARADES CANCELLED

All military parades and lectures are cancelled for Election Day. Those interested may attend a demonstration of practical anatomy following the voting. See programme for Election Day.

A Match for Anyone in S.P.S. Moeser for First Vice

The election of the Engineering Society Executive is something to really THINK about. Experience on the Executive body is something that cannot be replaced by idle words. The man for First Vice-President of the Engineering Society is the man who has spent the past year as an active member of its Executive, as Third Year President. This is not the only responsible position Bill Moeser has held during his stay at School. In Second Year he was Secretary-Treasurer of the Class of 4T3. This Class has "scored" both socially and financially during these two years.

Bill has always had the interests of the Little Red Schoolhouse at heart, and has always done his part to keep the S.P.S. flag flying. He has played baseball, basketball, and lacrosse as well as holding his "S", for three years of Hockey.

The First Vice-President is chairman of the committees that run School Dinner, School-at-Home and School-Nite. Naturally this calls for the man who has the ability, enthusiasm and experience to run social functions. Bill Moeser has all three of these necessary qualities. You all remember the Junior-Soph-Frosh last Friday night. This successful party was run by the Third Year executive, headed by Moeser.

OLD MAN MOSE AIN'T DEAD!

Schoolmen! Before you start the southward trek to Queen Street, to the polls and

for office must support each other with their one vote apiece.

The Gordian Knot will have to be cut and the two councillors-elect will be glad to receive any suggestions that may solve the problem. Such devices as flipping coins, guessing lucky numbers and drawing aces of spades from decks of cards have been advised.

Pistols for two and coffee for one was a

time-honoured custom as everyone knows, but how can we publish the next graduation number of Toike Oike minus either the editor or assistant editor?

As Shulman says, "Vote Rounthwaite for councillor, Shulman," and as Rounthwaite says, "Shulman, we can't afford to let you lose this election."

If one of 'em gets two votes—watch out! Fini Fifth Year Architecture!
